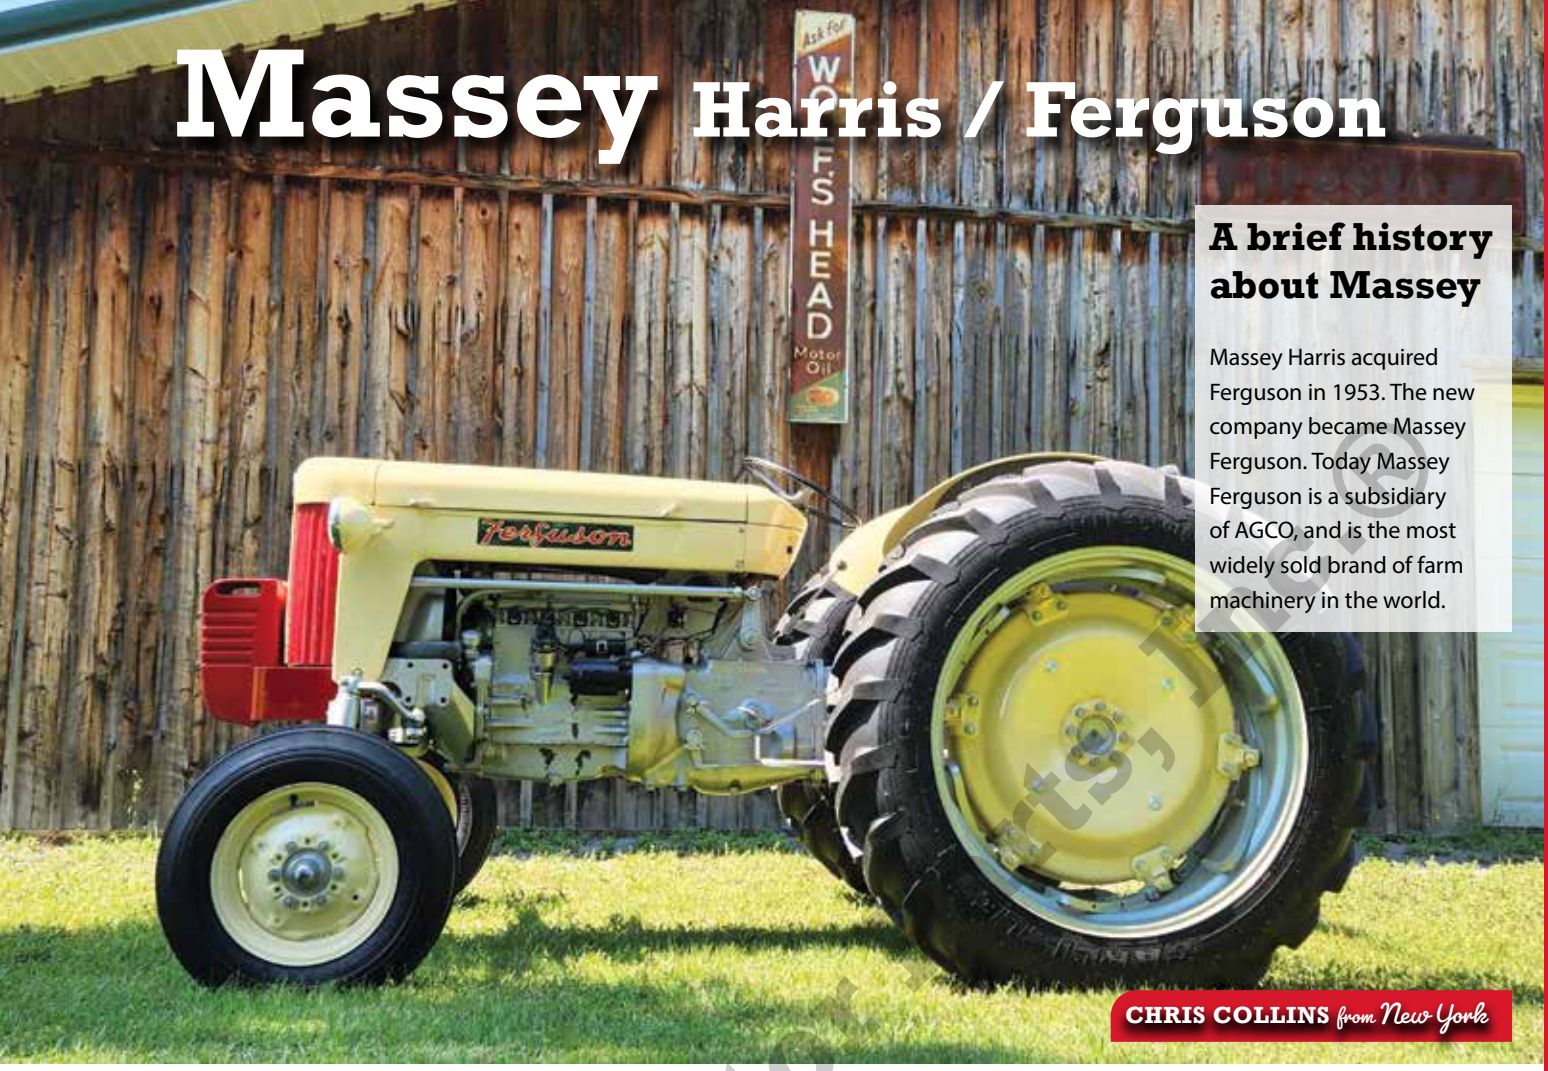
Massey Harris / Ferguson



A brief history about Massey

Massey Harris acquired Ferguson in 1953. The new company became Massey Ferguson. Today Massey Ferguson is a subsidiary of AGCO, and is the most widely sold brand of farm machinery in the world.

Tips on ordering an engine piston ring set:

Measure old rings before ordering. Do not order by tractor model only. To ensure you order the correct rings, you will need the following information:

1 Bore size
2 Thickness of each ring
3 Quantity of each ring thickness per piston

Piston rings can not be returned if opened. Call or email for price and availability of other sizes.

Piston ring sets - USA made (unless noted)

Electronic ignition II conversion kits - USA made

These kits work the same way as the original, but they sense current levels at the coil & adjusts the dwell to maintain peak energy throughout the entire RPM range. Dwell angle is increased or decreased with changing engine RPM & operating conditions. Also have a safety feature to prevent the module from burning out if the key is left in the ON position.

What is back spacing?

To determine back spacing lay your wheel flat on the ground with the back of the wheel facing up. Lay a straight edge across the wheel & measure the distance from the back side of the mounting surface to the straight edge. (I.E. The wheel pictured has a back spacing of 3-5/8").

Front wheels / rims

NOTE: To determine the width of Wheels / Rims: Measure the inside (bead to bead) not outside to outside. See page 400B.

Mylar decals

All decals are USA made.

Tips on applying our decals

All decals are mylar unless otherwise noted. Have the pitted area filled, sanded smooth and painted. Paint must be completely dry prior to installation (usually 3 - 4 weeks). Wash area with soap & water (new paint included) on which decal is to be placed.

For mylar decals (film between lettering): Trim to border of design where possible prior to removing white backing paper. Lightly spray the area with window cleaner (do not use window cleaner in aerosol can). Peel white backing paper from decal and place in position. Squeegee window cleaner from under decal beginning in center and working outward. If air bubbles occur, puncture with pin & smooth down.
Please note: These decals have been printed on a tough mylar film using mylar ink. A pressure sensitive adhesive has been employed on the back of the mylar to insure good adhesion to any clean, hard surface.

For vinyl cut deals (no film between lettering) Special order only: Peel backing paper from decal. The decal will be stuck to the application paper. Align the decal using the design, not the application paper, and firmly press decal into place. Slowly remove the application paper starting at one corner. **Please note:** The colors are fused into the vinyl eliminating stacking. CAUTION: Inspect all decal pieces before applying to tractor.

Parts manual reprint - Printed in USA

A parts manual (reprint only) has exploded views of all parts on the tractor. With numbered pictures giving you great detail on assembly and disassembly. It also gives you a guide, with numbers, for ordering parts, and makes you seem much more informed when talking with a dealer. Many service manuals, after telling you how to disassemble & repair in detail, will simply say "reassemble". If you have your PTO in the wash tank, in pieces, without notes, you have a problem. The parts manual can help you out with an exploded view of the PTO unit, and you can see immediately how it all goes back together. You need a parts manual!

Operator manual reprints - Printed in USA

An operator's manual (reprints only) sometimes referred to as the owner's manual is the manual that came with the tractor. It is the manual that was given to the ultimate consumer by the manufacturer. It can be compared to the manual you receive in the glove box of a new car. This manual gives the owner-operator instructions, shift patterns, capacities (anti-freeze, crankcase, etc.) and adjustment procedures (brakes, clutch, etc). This is a very useful and valuable tool in operating your tractor.

Service manual reprints - Printed in USA

A service manual reprint with wiring diagrams tells you how to take the tractor apart, how to fix it and how to put it back together again. It is a reprint of the manual that the factory furnished the dealer's shop service department, and was not sent or given to individual retail customers. It deals with repairs in the language of a mechanic. Often times it includes valuable information as to specifications, torques, etc. A service manual reprint will offer many short cuts and save you time!
